Education

Sep 2022-Present

Konya Technical University
Faculty of Engineering and Natural Sciences, Software Engineering, Konya
GPA - 3.53

Sep 2017-Jun 2021

Necip Fazıl Kısakürek Anatolian High School

Experience

Dec 2025 - Jul 2026

OdakGIS - Gültaş Software & Mapping Industry
Real Estate Management System (Angular & ASP.NET Core Web API)

Jun 2025 - Aug 2025

Intern Engineer, TEI TUSAŞ Engine Industries, Inc.
A tool was developed with Qt that automates manual testing processes.

Dec 2024 - Jul 2025

Student, Siber Vatan
Cyber Security, Reverse Engineering, Linux training

About Me

Software Engineering graduate from Konya Technical University with hands-on experience in full-stack web and desktop application development. At OdakGIS, I actively contributed to enterprise projects by developing REST APIs, managing databases, and building dynamic web user interfaces using ASP.NET Core, Entity Framework Core, PostgreSQL, and Angular, while collaborating in agile team workflows via Git/GitLab. At TEI – TUSAŞ Engine Industries, I developed Qt-based UI tools for test automation, supporting enterprise workflows in the defense and aerospace sector.

Skills

Frontend: React.js , Tailwind CSS , Angular **Database:** MySQL & SQLite, MongoDB, PostgreSql

Backend: Node.js & Express.js (REST API), ASP.NET Core MVC **Programming Languages:** C++ (Qt), JS, C#

Tools & Others: Git, GitLab, Jira, Postman, Swagger, SonarQube, Semgrep, Figma

Projects

ArticleSystem | *React* | *TailwindCSS* | *MySQL* | *NodeJs*

A web-based system that scores university-wide academics based on predefined criteria during reappointment and promotion processes, automatically fills out forms, and generates PDF reports with supporting documents.

MediaAssistant | *ASP.NET Core MVC* | *MySQL*

A web-based system that allows users to track their health data. Health information, reports, and media content are securely managed.

Real Estate Management System | *Angular* | *PostgreSql* | *ASP.NET Core*

A web-based GIS application for managing real estate assets on interactive maps, supporting polygon-based spatial intersection, union, and area analyses.

My-Website | *React* | *TailwindCss*

A personal portfolio website that showcases my projects, skills, and information about me.

MapAnalyzer | *C++ (Qt)*

A tool that analyzes .map files belonging to embedded systems, calculates STACK, RAM, and FLASH memory usage, and visualizes the results.

FakeTweetGenerator | *React*

A web application that allows users to create realistic tweet visuals by customizing the name, avatar, and content.

PosApplication | *React* | *NodeJs* | *MongoDb*

A modern Point of Sale (POS) application featuring product management, inventory tracking, order processing, and payment integration.

CashFlowApp | *React*

A React-based web application that allows users to purchase products within a set budget, track their expenses, and monitor their remaining budget.

PuzzleGame | *C++ (Qt)*

A puzzle game where the player moves pieces in different directions to achieve the correct arrangement. The game tracks the number of moves made..
